

JURASSIC PARK 2: THE LOST WORLD

Page 1 of 2

After discovering the second site that John Hammond created on Isla Sorna, you've joined the team to document the dinosaurs that are living there. Now you find yourselves stranded, surrounded by dinosaurs that are trying to eat you! As you are searching around the buildings on site B, you find a torn off note and a map of Muertes Archipelago & Isla Nublar (on next page). Once you have decoded the message from the note, use the map to find the way to escape.

23 May 1994

The dinosaurs have all broken out of containment. In order to escape the island use this key. Remember that a T-Rex can't see you if you don't move or shift, so only move four steps at a time.
