

The Abraham Nemeth mansion is hosting a dinner party. Invites go out and the guests prearrange before the party to hook up into couples. Each guest brings a partial six pack for his/her own secret stash. Each also brings a partial six pack of beer and places it on the table in a position such that their lover will know that it is for them (as shown below). Each guest consumes his/her private stash beer and then pairs that with the gifted beer his/her lover brought. Please indicate who hooks up with whom at this mixer and what they discover?
