

Crow's Flying Tour

The clues here are “end-to-end” and “a different kind of beer while in each flight” and “retrace her path.” To figure out the order, find the types of beer revealed when you put two brewery names together. e.g. APT PUPILS + NERDGLAM = PILSNER. Draw lines between the eight breweries. The lines will intersect with individual letters in the large neighborhood names. Answer: WITHOUT.

From	To	End of From	Start of To	Intersect
