

MURDOCH

If the A-Team is going to help, they need to break him out of the hospital that he is being kept in. Below is a map of the two floors of the hospital. But to protect Murdoch, the team removed and hid the corners of the 2nd floor. Once you have the map together, find the most direct route out of the building. Stairwells between floors are marked with a triangle. Cross off every letter you travel through, and the remaining letters spell Murdoch's two-worded code phrase.
