## AIR: BENDING CURRENTS

To fly, Aang uses his airbending staff as a glider to catch wind currents. To control his flight, Aang bends the wind currents from their original directions to a different direction. Every time Aang airbends, the wind causes any flags nearby to flap around wildly. To solve this puzzle, figure out what directions Aang flew in.

Unflawed, just right → Raw honey, or drink of the gods

Reply to a question → Someone who gets hairy during a full moon

Conflict where Achilles perished → A large crowd of insects

Quaker breakfast product → To ingest, or a small songbird

\_\_\_\_\_ driver: unwanted advice-giver → Timepiece, or to observe

Relax, slacken → To cheat a person out of their money

What fashion models walk down → An adage

Honeycomb constituent → Instrument played by Charlie Parker

Settler in a covered wagon, pathfinder → Veer away
