

Chris,

There are still *NINE* guests who don't have seats at the reception! Each of the tables (see chart) has *ONE* seat available. Can you please figure out who should sit where?

Love you,
Pat

1. *Burt* needs to sit as far as possible from your family. They still haven't forgiven him for the potato salad incident at last year's picnic.
2. *Harold* can't be at a table with or next to anyone's co-workers, for unspecified legal reasons. (I don't know; YOU ask him!)
3. *Jonah* should be as far as possible from the small children. He hates kids; that's what caused his latest breakup.
4. *Leizel* went to grad school with you, right? She should probably sit at that table.
5. *Noriko* says she's happy to sit anywhere, but we should really keep her away from her ex.
6. *Priya* doesn't get along with either of our families, but I think my mom is really holding a grudge after what happened during the softball game at last year's picnic.
7. *Sonjie* wants to give a toast, so she should sit next to us.
8. *Topher* says he'll sit somewhere between *Noriko's* and *Jonah's* tables to make sure they don't bother each other. But not next to *William*. They don't get along.
9. *William* gets really handsy when he's drunk. He needs to be at least one table away from any of these women and the wedding party. (Except *Noriko*. She thinks it's cute.)
