In this puzzle, you were given sets of items. In picture order above, they are the Beatles, days of the week, 'Big Five' african animals, colours of the rainbow, seven continents, seven dwarves, months of the year, and eight planets of the solar system. You had to fit them into the word grids provided, given that vertically merged cells represent the same letter. However, one item from each list will not fit into the set – instead, these eight leftovers fit into the central grid. When correctly positioned, the red squares spell out REMEMBER, you have to RE-MEMBER each set with one more item. ☺
