

Magic-User—Memorizing Spells

Puzzle by Neal Tibrewala, Austin, TX

Difficulty: **Medium**

You discover a wizard's study with many spell scrolls **carefully arranged** on a table. Memorize each of the spells by placing them into your memory (the grid below). The *central* thing to understand about spells is that magic is always a *combination of two ideas*. After your head is **in order**, you'll reveal a useful item to help you slay the dragon.
