

Sort posters by “year” (number in top left corner). Match up portraits with slogans (provided as stickers during event). Determine last name or only name of person in each image. Use letter-to-number conversion (A=1, B=2, C=3, ..., Z=26) to get difference between first letter of each slogan and person’s name (e.g., **P**rogress - **O**abama = 1 = **A**) to obtain the two-word answer: **DECAF DRAMA**.
