Napkin – Location Puzzle Solution

Some of the letters are slightly different than the other; the 'l' in 'lf', the 'a' in 'can' for example. There are 10 letters like that.

I A L Y K H S L A E

Notice that 'call me' is underlined. That is a clue that you have to call a phone number. By converting the letters above to the numbers on a telephone key pad you get the following number.

(425) 954 – 7523

When the number is called the following voice mail message is heard.

Hi puzzler,

*I am so glad you figured out my number. Now listen carefully for your final quest. In order to make the other knights **green** with envy, you must slay the **dragon** that slumbers in the valley between the **yam hills** and the **bell mountain**.*

Good Luck.

The emphasized words are exaggerated in the message and should hint that you need to go the Green Dragon located between SE Yamhill and SE Belmont.
