

## Meta Walkthrough

Fill the answer words into the blanks. See the numbers beneath each puzzle logo? Index that number into the answer word for that puzzle. You will get the message ADD FORSIGHT.

See the cards at the bottom of the page? They look suspiciously like Braille, but it doesn't spell anything. Write ADD FORSIGHT above the cards, one letter above each card. Find the braille characters for each letter of ADD FORSIGHT and add it to the card below. A minus sign means to remove any pip which appears there. You will now have a new set of braille characters. You can find a braille alphabet on your code sheet.
