

# Ballot Solution

1. Cut out the three ballots.
2. Use the logic clues to fill out the three ballots. One section ("Best Recycled Artwork") will be ambiguous. This is okay.
3. Stack them in order, either alphabetical or by serial number (they both will sort the same).
4. Fan them out slightly.
5. Use the dots to solve for braille. The one ambiguous answer can be easily backsolved at this point because there is only one valid pairing of dots that leads to an alphabetic letter.
6. "PARTY"

P.S. Did you notice anything about the serial numbers?
