## Answer Sheet

Welcome to Puzzled Pint!

### Tonight

- We're here to help! This is not a competitive event. Ask the Game Control volunteers (GC) for hints as often as you'd like. The goal is to have fun, not to be frustrated!
- **If your location is running virtual**, go to the location page (linked on puzzle download page) and find out how to contact your local GC.
- **If you are collaborating online with your teammates (or have no printer)**: There is a Google Sheet this month! Download and make your own copy to collaborate online together. It can be found on the page where you downloaded the puzzles.

### The Puzzles

- Each puzzle will solve to a short word or phrase. How? That's for you to discover.
- Need a code sheet or solving resources? Check out the Resources page on Puzzled Pint's webpage: <http://www.puzzledpint.com/resources/>
- You can use anything to help solve: Use your phone; the internet is fair game! Think your brother might have an insight? Give him a call!
- While each month has a theme, you need no special knowledge of the theme to solve.

# PEARL'S CROSS-SWORD PUZZLE

(PAGE 1 OF 2)

Example

SAWS            NAPALM  
 WREN           REQUIEM  
 INVEST        PASSWORD

Pearl keeps her sword collection very organized. Can you fit the given set of swords into the grid? Sword placement must obey the following rules:

- Each sword has one cross-handle, which is already placed in the grid. The blade of the sword extends in one direction from the cross-handle. In all the other three directions, the handle extends by exactly one square.
- Each sword has a different word from the given list written along the entire length of the blade, one letter per square. For example, a blade that is 4 squares long will be labeled with a 4-letter word. The first letter is placed adjacent to the cross-handle and the rest of the letters follow in order, with the last letter placed at the sword's tip.
- Sword handles never intersect with any parts of other swords. Blade sections may intersect other blade sections if they contain the same letter. In this manner, every sword will intersect exactly two other swords.
- Black squares in the grid cannot contain any part of a sword.

Hint for starting: If there isn't enough room for any word to fit when starting at a certain side of a cross-handle, then that side must have a handle part instead. That handle part might block other potential blades, eliminating more possibilities.

# STEVEN'S MUSICAL ADVENTURES

Steven enjoys singing songs while helping everyone in his hometown of Beach City. Fill the seven empty regions of this map with the seven locations he visited this week, based on the following clues:

- Fish Stew Pizza (where fish can be your SOLE topping!) is not in the top row of the map.
- The Big Donut (where Steven buys his daily DONUT) isn't adjacent to either of the two Funland locations.
- The Residential District (home to Steven's friends Onion, Sadie, and LARS) is located exactly between the Funland Amusement Park (which has a hall of MIRRORS) and "It's A Wash" Car Wash (where Steven's FATHER Greg works).
- The three locations that border the ocean, in some order, are Fish Stew Pizza, the Funland Arcade (where various TIERS of prizes can be won), and the Crystal Temple (where Steven lives and acts like a REGULAR kid).

For each of his four adventures this week, Steven made up a new song that allows him to retrace his steps through everywhere he visited.

# METAPUZZLE: FUSIONS

Crystal Gems can “fuse” with other Crystal Gems, forming a larger, stronger “fusion” that shares their qualities. Steven can even fuse with his friend Connie, creating a fusion named Stevonnie.

A fusion’s strength depends on the members of the fusion having a strong, healthy relationship. For example, they might share breakfast together – or lunch, or brunch. Steven has an idea for something else that can make a fusion’s bond even stronger. What is it?

Use the previous puzzles’ answers to complete the clues below. The answers to these clues are in alphabetical order. Group those answers in pairs (or in one case, a trio) to create fusions. Write each fusion next to the set of characters whose puzzle answers contributed to the group’s clues.

- From the **[Pearl]** of England, maybe \_\_\_\_\_
- “Game” where two **[Garnet]** face toward each other \_\_\_\_\_
- Put your **[Amethyst]** down quickly \_\_\_\_\_
- [Amethyst]** out \_\_\_\_\_

# BROKEN GEMS

Several gems have been slightly broken, and ended up resembling new words. Steven tried to help change them back, but his healing powers went awry and transformed the clues to the words instead! Figure out the word being clued, then apply the transformation to fix the gem. If you're successful, you'll reveal what all these gems have given Steven in return.
