

*Dinner*

*February 2011*

## *SOLUTION*

Each of the five reviews has a unique size in italics – Extra small through extra large. Order the reviews by size, from smallest to largest.

Then, index into the restaurant names by the number of stars. (Stars are identical for restaurant average and the reviews shown.). The puzzle's solution is: VODKA.

(Optional: Using the same ordering, index into the names of the reviewers for a second word, "drink" - "VODKA DRINK" and "VODKA" were both acceptable answers.)
