

## GOT IT COVERED

Solution:

The numbers that match the hints should be those shown below, and when those folds are made they produce dot patterns that match up with the braille code for (top to bottom) **BLINDFOLD** (Of course, the play on words since you are folding the paper to make braille letters)

1LU, 3RO, 6BU	→ B
1 LO, 3LU, 4TU	→ L
