

# ANSWER SHEET

Welcome to Puzzled Pint!

Puzzling  
Basics

Tonight your packet contains four puzzles. Each puzzle will somehow solve to a **short word or phrase**. If you're joining us for the first time tonight, please read our *Puzzling Basics* page by going to <http://www.puzzledpint.com/basics> or by scanning the QR code. Note the "**How to solve**" section that discusses puzzle techniques like indexing and using the code sheet, which should have been provided to you along with your packet.

Puzzled Pint is **not a competitive** event. We encourage you to **ask Game Control (GC) for hints as often as you'd like**. Our goal is for you to have fun, not to be frustrated!

While we like to theme our puzzle sets, most puzzles do not require special knowledge of the theme to solve them. Still, using the internet is completely allowed and even expected for some puzzles.

When you've solved all four puzzles, confirm your answers with GC, and you'll get the final **meta-puzzle**, which requires the previous puzzle answers to solve.

When you're all finished, please **return this answer sheet to Game Control**, along with your code sheet and any borrowed items like pencils, tape, or scissors. Returning your answer sheet with an accurate count of your team size will allow us to make sure that we have enough space for everyone at our venues in future months and that we have enough puzzle packets available. Additionally, you'll be able to see how your time ranks relative to other teams worldwide on our web site.

If you'd like to provide any feedback on your experience tonight, please scan the QR code on the right or visit <http://www.puzzledpint.com/feedback>.

Thanks, and we sincerely hope you enjoy your evening! — *Puzzled Pint GC*

Team Name: \_\_\_\_\_ Team Size: \_\_\_\_\_

Movie Time \_\_\_\_\_

Pint Love \_\_\_\_\_

Cupid's Follow Up \_\_\_\_\_

Love You, I do \_\_\_\_\_

Valentine's Day \_\_\_\_\_

## Question of the Month

Are the difficulty ratings on the puzzles helpful to your team?

0-Harmful,  
remove them

1-No,  
but don't hurt

2-Yes,  
but not necessary

3-Yes!  
Please keep them

It's time to watch some romantic movies. I didn't realize that these movies could share so much among each other. I'd better organize them to find out something about their degrees of love....

- FORGETTING SARAH MARSHALL (23)
- FOUR WEDDINGS AND A FUNERAL (23)

# Pint Love

★★★★☆  
Author: Jen Dumont, Portland, OR

If there is one thing that I love, it's a good pint of beer, or two, or three, or..... Sorry I just got wrapped up in my pint. Where was I? Oh right, sometimes I'm **blind drunk** and don't understand unless I look inside my pint.

Cut out the 6 strips along dotted lines and fold in half length wise and assemble and see your pint show you a message.

# Cupid's Follow Up

Cupid made some matches in the past, and now would like to follow up with the couples to see how things are going. These couples' love didn't always take a straight line, but had many turns in all directions. Nibble away at this puzzle to get a message.

February 2017

# Love you, I do

Love you, I do. Let me count the ways. Most numbers mean nothing unless you create a heart to unlock its secret. Someone will be waiting for you, but first you will be **forced** to choose the good side.

Author: Jen Dumont, Portland, OR

Love you, I do. Let me count the ways. Most numbers mean nothing unless you create a heart to unlock its secret. Someone will be waiting for you, but first you will be **forced** to choose the good side.

Author: Jen Dumont, Portland, OR

Instructions:

- Cut out the grid as one big square.
- Place printed side down with the arrow pointed up. and keep this orientation until step #10. Note that printed side will be represented by gray in these diagrams and instructions. Also, the triangles and numbers in each square are not represented.
- Fold over corners as indicated in diagram A which will result in diagram B.
- Make 4 mountain folds as indicated on diagram C. The completed folds will look like diagram D.
- Focus on the upper right corner. We want to flip the printed side to the back so that we just have the white (unprinted side) showing. You will make a small, one-square diagonal fold, not on the printed-side square, but on the white paper below. Fold where indicated on diagram D.
- Tilt the printed side square backwards, then crease diagonally on the white of the paper. The printed side of the square will have not been creased and is now on the opposite side. The corner will now be a complete corner of white. Repeat on the upper left and lower left corners, but not the lower right corner.
- Make 2 valley folds as shown in diagram E. Crease well and unfold after each fold.
- Make a mountain fold as shown in diagram F. Crease well and unfold.
- Now we are going to collapse the paper. The creases we made in steps 7 and 8 will help us. Bring the top part down and the left side over as show by the arrows in diagram G. It should collapse into a 4 by 4 grid that looks like diagram H.
- Flip it over and orient as shown in diagram I. Make a valley fold with only the top layer as indicated in diagram I. The back side should look like diagram J and the front side like diagram K.
