Freya's First-rate Bike Tour

Every brewery name is a reference to an ordinal list. Use the topographic level of each brewery to determine what item in the list it's referring to.

The breweries are each nine grid squares apart. (Put another way: there are eight squares between one brewery and the next.) The only way to order those nine breweries according to the rules is to start at MOONWALKER and end at PRIME. In this order, the nine extracted letters spell BREWERIES.
